OVERVIEW:

KFUPMCoursecraft is a web application that allows students to build their academic plans and access resources easily

FEATURES:

- ✓ Resource Access
- ✓ Develop and Modivfy Graduation Plan

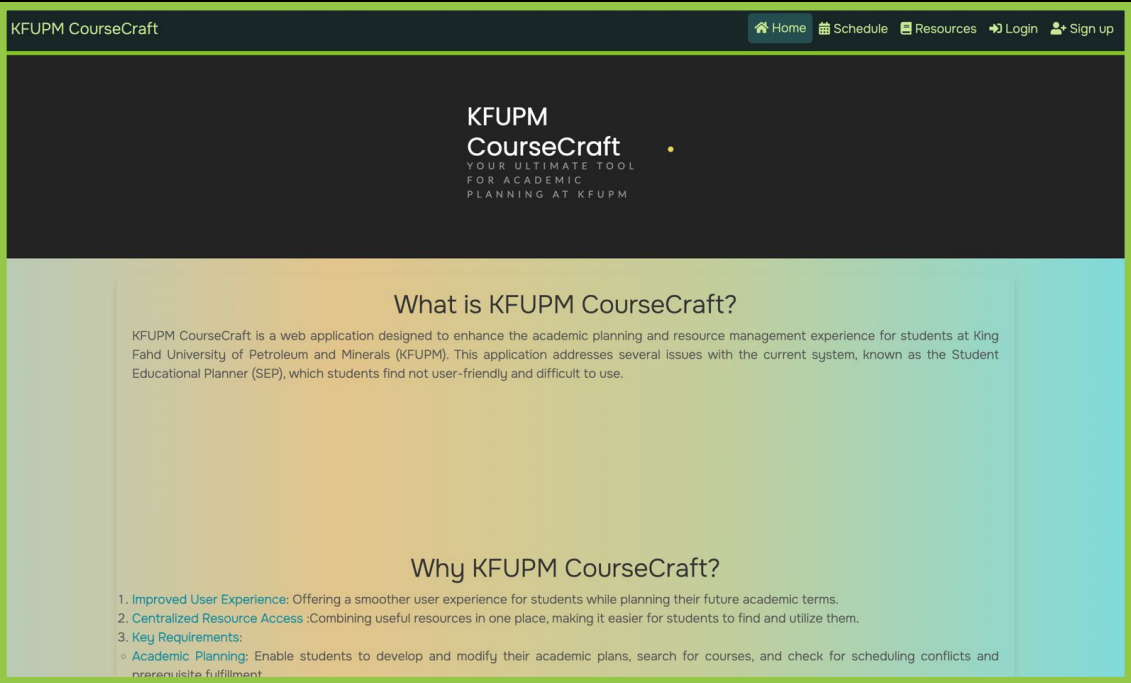

Problem:

KFUPM students think that the current system – Student Educational Planner (SEP) - for planning for future terms is not usable, and not user-friendly, and KFUPM’s resources are scattered, and it is a hustle to navigate to it.

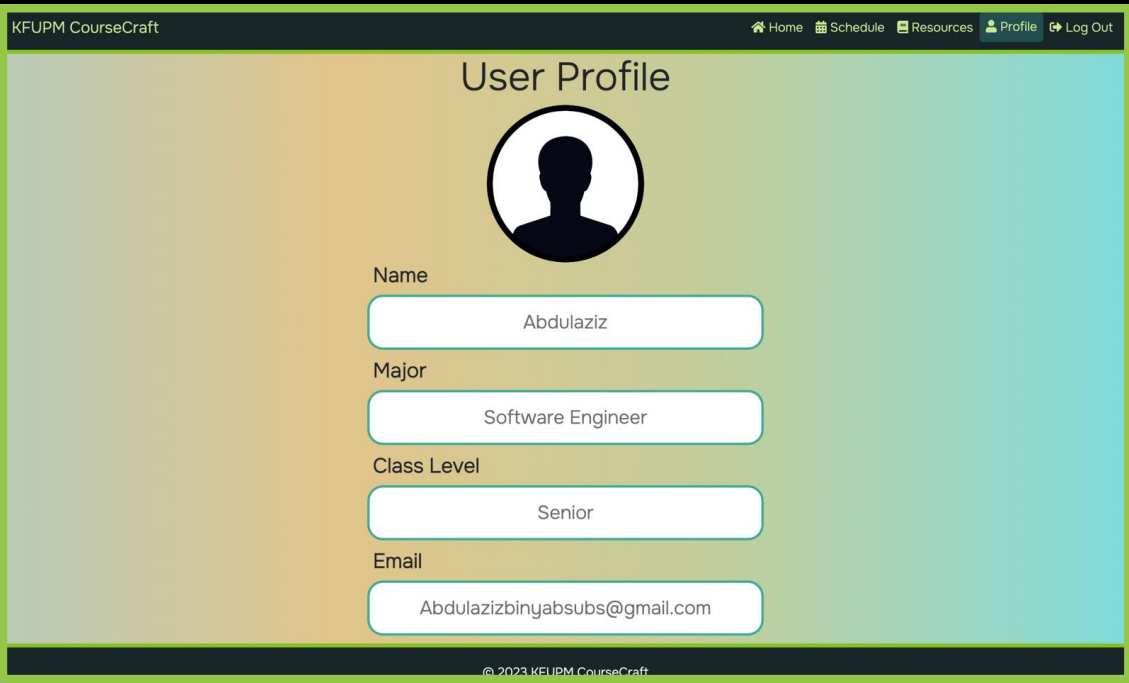

Solution:

Our website will provide the user with a smoother user experience while planning, and combine the most useful resources in one place.
